SUBJECT: Organization and Functions - Supply Division

1. MISSION

Formulate, implement and administer plans, policies, procedures, methods and standards for the operation of the Agency supply system in order to receive, inspect, account for, store, maintain, issue, and dispose of Agency materiel.

2. FUNCTIONS

25X1A

a. Chief, Supply Division, is the Accountable Officer for all expendable and nonexpendable material in stock; nonexpendable material in use in [redacted] depots, in use at headquarters, and certain [redacted] stations for which accountability is maintained by headquarters.

b. Office of the Chief

25X1A6A

- (1) Exercise command of [redacted] supply installations and technical control over the supply operations of Agency supply depots.
- (2) Furnish technical guidance and assistance to Agency-wide supply operations.
- (3) Act as the Staff Supply Office in an advisory capacity to the Director of Logistics on all matters pertaining to supply.
- (4) Perform liaison functions with Department of Defense elements in matters concerning Agency supply operations.
- (5) Ensure the training and availability of qualified supply personnel for Agency-wide requirements.

25X1A

- (6) Approve budget estimates for operation of Supply Division, [redacted] depots, and the administrative stock account.
- (7) Direct performance of administrative duties relative to personnel, internal security and the receipt and distribution of mails within the headquarters supply complex.

ORGANIZATION
December 1956c. Inspection and Inventory Staff

- (1) In conjunction with Supply Policy and Procedures Staff, develop, coordinate and implement procedures relative to internal audit of stock record accounts and Agency-wide inventory functions in the implementation of the Agency supply system.
- (2) Program, schedule and conduct inventories of all classes of stock material on hand and in use; review and check mathematical accuracy of stock record accounts to assure reconciliation to physical inventories through preparation of reports of inventory adjustment.
- (3) Conduct periodic reviews and lend technical assistance to Agency depots and stations to ensure adherence to established audit and inventory regulations, policies and procedures.

d. Supply Policy and Procedures Staff

- (1) Develop, implement, coordinate, review and analyze regulations, plans, policies and procedures relative to the establishment, operation and maintenance of an effective Agency supply system.
- (2) Implement and install supply systems as well as lend technical assistance through liaison with and visits to Agency installations.
- (3) Perform special staff studies and special assignments to improve supply support programs; resolve special supply problems; and develop internal structural and functional organizations.
- (4) Perform the staffing functions as the staff component for the Chief, Supply Division, through liaison with operating and internal elements on routine and nonroutine information and directives received from higher authority.
- (5) Develop and administer management tools for evaluating effectiveness of supply operations, including personnel ceilings, activity reports, reports control, forms control, work measurement and other statistical analyses.
- (6) Coordinate with the Training Officer of Logistics relative to organizing, formulating and presenting training programs as well as coordinating placement of personnel into OTR programs.
- (7) Monitor and direct supply action for special projects necessitating special handling and coordination to assure timely support in meeting operational deadlines.

ORGANIZATION
4 December 1956e. Identification and Cataloging Branch

- (1) Develop a standardized Agency Catalog in accordance with the Federal system.
- (2) Establish and maintain a master nomenclature file for all items of supply.
- (3) Maintain liaison relative to cataloging matters with other Government agencies.
- (4) Develop procedures for domestic and overseas supply cataloging activities.

(a) Technical Section

1. Review and classify materiel items required for Agency use, assign supply classification codes and identification numbers, and prepare item narrative descriptions.
2. Select items to appear in the Agency Supply Catalog and prepare catalog description cards for new items of supply required for Agency use.
3. Perform physical inspection of material to determine item identification.
4. Conduct research of brochures, catalogs, and blueprints of manufacturers, as well as catalog data of other Federal agencies, in preparation of spare parts listings.
5. Provide technical guidance to operating officials relative to interchangeability or substitution of items of supply.

(b) Catalog Publication and Distribution Section

1. Prepare and maintain catalog panels, EAM card coding and filing system on all items; monitor catalog publication and distribution and retain a log of cut-off dates indicating effective dates for catalog usage.
2. Develop the Supply Catalog introduction, arrange alphabetical indices, illustrations, abbreviations and symbols, as well as design the catalog cover.
